The Great Escape is an isometric action-adventure game. Controlling a prisoner of war in a German camp, your goal is to break out undetected. There are numerous ways to freedom – back doors, cracked fences, even underground tunnels. However, you have to plan your escape while obeying the strict rules of the camp.

Number one: Daily program. You have to attend two roll calls a day, one meal, one exercise, and stay in bed at night. Failure to appear at any of these events will result in the alarm being rung. When you do not touch the controls, your protagonist will move

automatically, going to all important events. You have to detect and use gaps in the time-table to explore the camp.

Rule number two: guard rooms are off limits. If a soldier catches you in a room that is forbidden, you will be placed in solitary confinement. Of course, you have to enter restricted parts of the camp to find items crucial for your escape. The moral flag will turn from green to red to indicate that you are in an area where you shouldn't be.

Rule number three: no prisoner may carry forbidden objects. When you are caught in a suspicious situation, you will be stripped of all items that you found so far. To avoid that, you have to deposit objects in a safe place. You need to find keys to open locked doors, uniforms for camouflage, flashlights to see in dark tunnels, and many more.

Rule number four: guard commands are to be obeyed at all times. The German soldiers patrol on fixed routes and have a line of sight. You have to learn the guard's routes and sneak past their backs to avoid detection when breaking out. If you are caught, your morale will decrease. If your morale reaches zero, your will to escape is broken.v

Ultimately I think this game is a bit of a con job. It has realism and intelligence only on the surface. Underneath that it's full of unimpressive problem solving, the worst of these problems (the ridiculous location of a vital tool) being almost a "dealbreaker" for me. It's the kind of problem that makes me wonder if the designers\programmers care about how much valuable time their customers must spend on their games to make satisfactory progress. Well I came back for more and with help from Google, got near the end, but after I had the same obstacles again and again I decided that I wasn't going to bang my head against a wall like an idiot, no matter how close to the end. So I guess the game is tempting, the detailed graphics and the strict prison schedule giving the game a grimly attractive atmosphere hence my calling it a con job.. \u2605 \u2605 \u2605 \u2605 \u2605
